File: presentation.pdf
Parts: 9 (mixed text+images in send order)

This PDF illustrates the exact combined request order.
Each subsequent page shows one part (text or image).

Part 1 ? TEXT
You are a helpful assistant analyzing full documents combining text and images. Use ALL provided information to infer: creation_date, a short title (3-4 words), a meaningful summary (3-4 sentences), creator/issuer, suitable tags (list), an importance score (0-10), and a confidence (0-10) for each field. Always answer in German and output a single JSON object with the same structure as previous runs.

Existing document context (to be extended consistently):
{"summary": "", "summary_confidence": 0, "title": "", "title_confidence": 0, "creation_date": null, "creation_date_confidence": 0, "creator": "", "creator_confidence": 0, "tags": [], "tags_confidence": [], "importance": null, "importance_confidence": 0}

The following content is provided in strict reading order (top?bottom, left?right) on each page.
